

GEOLOCATION SOLUTIONS FOR TELCOS ARE READY FOR PRIME TIME

All use cases in one place

Emergency call location | Population alerting | Situational awareness | Police investigations
Location-based ads | Fraud detection | Geoanalytics | IoT & connected cars

Enhance public safety and regulatory compliance

CSPs are expected to proactively plan LBS capabilities, ensuring compliance with evolving regulations for public warning systems, emergency call location & AI-assisted police/justice investigations.

Monetize your network data, especially 5G advanced use cases

5G SA is an exponential leap in terms of spatial and temporal accuracy. Combined with network-wide location capabilities, it unlocks promising use cases: asset tracking, connected vehicles, enriched geostats...

Improve customer lifetime value (CLV) & customer experience (CX)

Leverage network-wide and light-touch location-based services (LBS) to boost roaming monetization, enhance engagement, and put into place effective churn detection and proactive retention strategies.

NETWORK LOCATION ALL-IN-ONE PLATFORM NO COMPROMISES

Location accuracy at scale in real-time

- 100% technologies available combined, enhanced by AI
- 100% coverage: for all network generations
- 100% SIM cards; 5,000 location points per SIM per day

Minimal investment & future-proof

- Minimal impact on network load
- Minimal hardware investment, seamless integration
- Network equipment vendor agnostic

Your complete market advantage

- Data security & privacy compliance
- Portfolio of composable applications
- Full control over accessibility, agility, & scalability

UNVEIL YOUR TRANSFORMATIVE POWER WITH INTERSEC

Intersec is the European leader in telecom metadata and location intelligence solutions. Designed by fast data experts, our solutions guide telecom operators and governments in their data-driven revolution to build tangible value out of telecom metadata, from efficiently warning people in case of danger to creating new sources of revenue. Our 75 clients in 50 countries leverage our instruments to locate and map nearly one billion mobile devices 24/7, and our public warning solutions cover 30% of the population in the European Union.
