

Technical Sheet

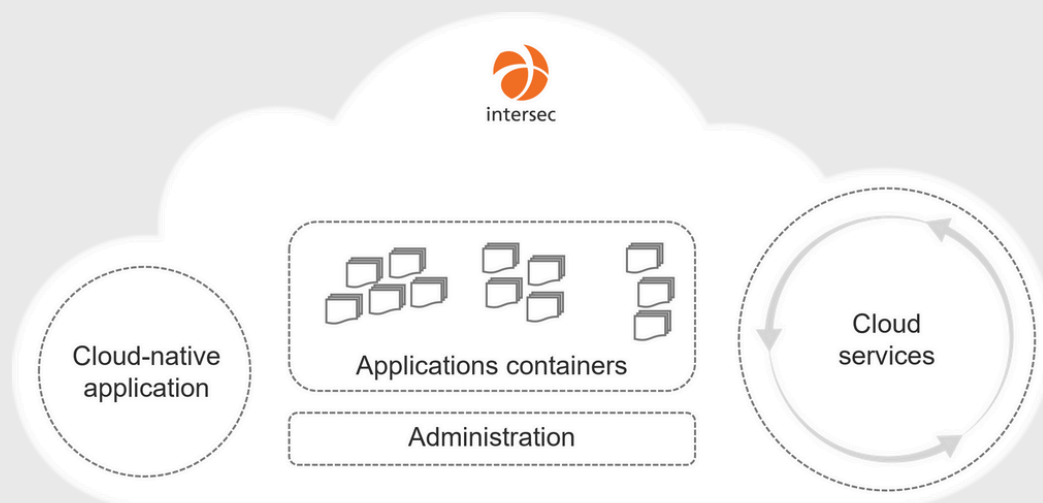

Intersec Cloud

The Intersec cloud offers a versatile and powerful solution tailored for public authorities and telecom operators. Our infrastructure-agnostic approach supports multiple deployment options, from simple CNF delivery to fully managed and hosted solutions.

CNF: THE SIMPLIFIED PATH TO CLOUD DELIVERY

Our cloud-native software is deployed as CNFs, which offer key benefits:

- Flexible hosting options
- Quick deployment, regular updates
- Optimal reliability and performance
- Enhanced security and compliance
- Data sovereignty and control
- Optimized resource utilization
- Pay-as-you-go flexibility
- Automation and orchestration

RED HAT OPENSIFT CERTIFIED APPLICATIONS

AGORA and GeoSafe PWS are Red Hat OpenShift certified.

- AGORA is an end-to-end hybrid location platform that seamlessly combines active location-based services and passive mass-scale location intelligence leveraging 40+ location techniques. AGORA achieves pinpoint accuracy of below three meters with minimal latency — outperforming other providers in comparable tests.
- GeoSafe PWS enables the authorities to leverage emerging technologies to detect and respond to incidents and critical events as they arise. It offers a multichannel, end-to-end and modular approach of national public warning architecture combining Cell Broadcast, location-based SMS, advanced analytics, and AI features.

INTERSEC CLOUD PLANS

There are four plans available, with many possible configurations:

	1	2	3	4
	CNF Delivery	CNF Toolbox	Cloud Services	Intersec SaaS
	Delivery of Intersec software in container format	Software suite for Intersec software management	Full management of Intersec software	Intersec Software as a Service (SaaS)
On-premise deployment	✓	✓	✓	
SaaS deployment				✓
Delivery in OpenShift certified containers	✓	✓	✓	✓
All software updates as containers	✓	✓	✓	✓
CNF tools: packaging, configuration, maintenance		✓	✓	✓
Cloud Infrastructure included		✓	✓	✓
Fully managed by Intersec			✓	✓
Fully hosted by Intersec				✓

GO BEYOND: WITH INTERSEC CLOUD SERVICES

On top of the CNF delivery, Intersec provides governments and businesses with a fully managed environment to securely process and analyze metadata where they can seamlessly activate additional applications and integrate their existing solutions through APIs. This approach not only enhances operational efficiency but also ensures the highest standards of security and compliance across all data processing activities.

About Intersec

Intersec is a global leader in telecom metadata and location intelligence solutions. Designed by fast data experts, our solutions guide governments and telcos in their data-driven revolution to build tangible value, from efficiently warning people in case of danger to driving new sources of revenue. Our 90 clients in 40 countries leverage our instruments to reach, locate, and map nearly one billion connected devices 24/7, and our mission-critical communication solutions cover 400 million people around the world. Headquartered in France, Intersec places Privacy by Design well beyond accepted standards. Learn more at intersec.com.
